## Setting Tools for Metal Anchors

For best results use a dedicated setting tool when fixing metal anchors into hollow walls.

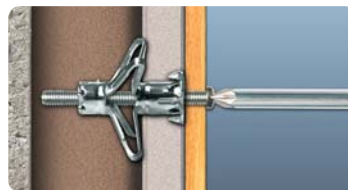

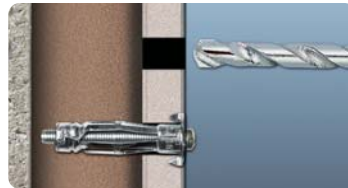

**Greater control, tighter fit... more secure.**

**Its Quick and Easy...**

Hand lever setting tool, lightweight and easy to use.

**Simple to use...**

Heavy duty pistol grip setting tool.

1. Drill the hole to the correct diameter for the Fixing (see pack).
2. Insert the Fixing.
3. Pull until you feel resistance, the Fixing opens up and grips to the wall.
4. Remove the screw from the Fixing. Put the fitting to the wall and screw tight using a hand screwdriver.

**...gives effortless results!**
